

PRODUCT INFORMATION

GULF NO RUST WXD 32

General Qualities and Characteristics

Gulf No Rust WXD 32 is a rust preventive developed to perform under severe conditions, based on petroleum solvents, specially selected lubricating oils, high quality corrosion and oxidation inhibitors, detergents and special film forming ingredients to give a film. The product has excellent metal wetting and water displacing properties. It can be applied either by spraying or dipping. The film formed is highly effective in preventing corrosion, it can be removed by solvent or alkaline degreasing.

The major advantages of this product are:

- Excellent resistance to corrosion
- High mechanical strength, which offers ease of handling after application.

Application

Gulf No Rust WXD 32 is formulated for the protection of valuable components like machines and machine tools. It is used as a final protective coat for tools and machined components even under severe conditions.

The typical applications of Gulf No Rust WXD 32 include,

- Rust preventive coating for tools, bearings etc. under severe conditions
- For coating machined components under severe conditions

Typical Properties

PROPERTY	TYPICAL DATA
Appearance	Clear, Amber fluid
S.G. @ 29.5°C	0.829
Solid Content % by mass	30
Film Thickness	5 Microns
Film Type	Waxy
Coverage	60 M ² /Lit
Dewatering Property as per IS 1154	Passes
Flash Point	50° C
Protection Indoors	18 Months
Protection Outdoors	9 Months

Properties mentioned above are typical only and minor variations, which do not affect the product performances, are to be expected in normal manufacturing. The above information is based on past history of the grade only and must not be construed as a guarantee of performance. Follow equipment manufacturer's recommendations for performance level and viscosity grade. The Material Safety Data Sheet for this product is available with your nearest Gulf office.
